

Focusing On Your Needs

SHIPPING

- ▶ SYSCO Central Pennsylvania has over 90 delivery trucks in our fleet that log over 3,400,000 miles per year. Over 60 percent of the trucks are equipped with lift-gates, which help to decrease our delivery time per stop, and all of them have fiberglass walls which run down the center of the trailer separating the frozen and refrigerated product. Trailer temperatures are electronically monitored and recorded to ensure product integrity.
- ▶ Our fill rate is defined as a percentage of the number of cases ordered versus the number of cases delivered. Situations that affect fill rates are caused by mispicks, damages or warehouse outs.
- ▶ Our current fill rate is **99.7%**
